Black Bruin BBR HD Rotator

BBR HD rotator is the top choice for heavy duty harvesting when productivity, strength and endurance are appreciated. Unique, adjustable and wear-proof brake guarantees smooth harvesting by damping the head swing as needed. BBR HD stands for reliability and suitability for all harvester head applications.

■ Proven in harvester head applications.

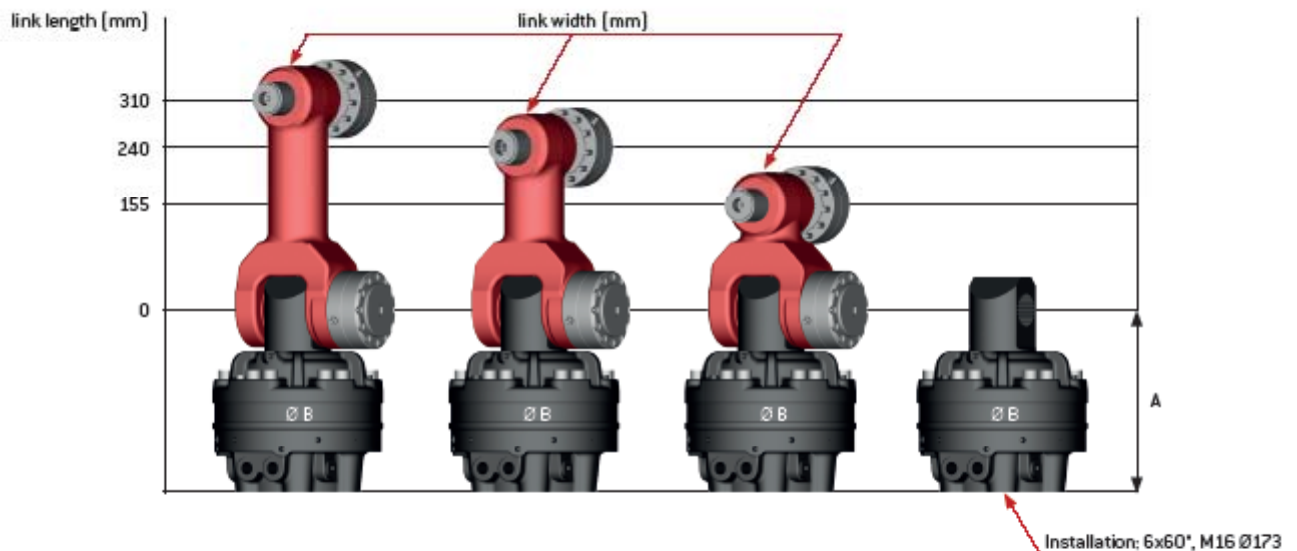

**Black
Bruin**

Features and benefits

- excellent load capacity in radial and axial direction
- constant high torque throughout the turning range
- built-in double-acting pressure relief valve
- one or two unique, adjustable and easy-to-service swing dampers
- all-season sealing
